

Energy Transition. Sustainability. Growth.

We would like to cordially invite you to TRANSFORM 2024 in Prague.

This technical conference will particularly focus on the energy transition, as well as on sustainability and growth in regard to power transformers and grid operation. The various topics will be presented in a combination of keynote talks, discussions, technical lectures, and a special exhibition.

Since we expect more than 200 experts from distribution and transmission system operators, transformer OEMs and infrastructure operators, as well as EPCs and consultants, TRANSFORM 2024 also provides a unique networking opportunity.

Energy Transition. Sustainability. Growth.
